

VJD-KBD-X1 License for one additional keyboard

VIDEOJET decoder

The VJD-KBD-X1 license extends the functionality of the VIDEOJET decoder 7000. It allows the connection of one additional PTZ keyboard, enabling two operators to manage and control a CCTV system simultaneously. With this license, the decoder supports dual-operator control using the built-in IP Matrix feature. This enhancement is ideal for improving system responsiveness and increasing operational flexibility in surveillance environments.

Parts included

Quantity	Component
1	License for one additional keyboard

Technical specifications

Supported device	VIDEOJET decoder 7000
License type	Software license
Control interface	IP Matrix built-in functionality of the decoder
