

KPD01

External Keypad for Display Hotkeys

- > Designed for QX2702, QX3202, QX4302, QX5502, and QX6502
- > **10 programmable keys** for fast execution of essential display controls in time-critical operations.
- > **Direct D-sub 15 connection** ensures stable, immediate communication with the display.
- > **Quick access to the selected OSD functions** for fast adjustments without navigating full menus.
- > **Maintains operability in enclosed installations** where onboard buttons are difficult to reach.
- > **Supports efficient multi-display workflows** with consistent, repeatable control actions.

KPD01 external keypad is designed as a dedicated control accessory for professional display deployments, it provides operators with a faster, more assured way to interact with their monitors—especially in environments where response time and reliability are crucial. Its hard-wired design and configurable interface make it a practical extension of the display, giving users immediate physical access to the functions they rely on most.

Specifications
